Height: 52” (61” Overall)

Cover can be cut for shorter heights

Material: Thermoplastic HDPE

Installs over standard SlowStop Steel Rebounding Bollard Kit or any 6” schedule 40 steel bollard.

INSTALLATION INSTRUCTIONS

1. In addition to your bollard cover, your shipment includes eight Gripper Tabs.
2. Install one self-adhesive Gripper Tabs around the top of the bollard with the “fingers” pointing down, and one more near the base of the bollard on the opposite side of the first Gripper Tab.
3. Install the bollard cover over the Gripper Tabs. Tabs should provide a tight installation which cannot be easily removed.
4. The bollard cover should securely fit entirely over the length of the post and butt up against the SlowStop base.
