

CASE STUDY

MODULAR CAPABILITIES FOR UNIQUE APPLICATIONS

CUSTOMER:

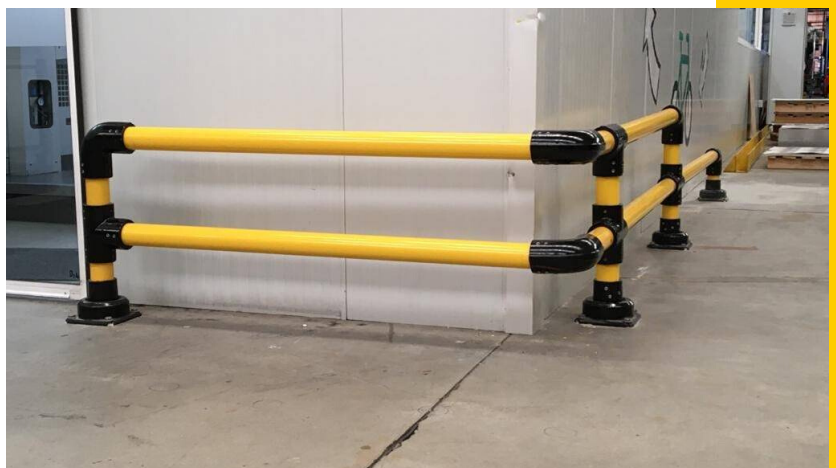

European Leader in Metal Fabrication

SITUATION:

Being an industry leader, safety of employees and equipment was a top priority. But finding a solution to fit the very unique footprint and very specific protection was not easy to find.

SOLUTION:

Working through INDUSTRIALES DE MANUTENCION, a SlowStop distributor in Spain, they were able to create the perfect solution. SlowStop's one of kind modular capabilities and stopping power were a perfect fit. The SlowStop engineering team worked to create unique drawings for the specific safety and protection needs. The ability to have open communication with the SlowStop team throughout the process made the process seamless, creating a solution that once installed has not needed any modifications. The company is already looking to SlowStop again for new projects, since it is the only solution available to be so completely adaptable to any unique situations and working with the SlowStop team makes it an obvious choice for all guarding needs.
