

PRODUCT BULLETIN

Date: August 2020

Products Affected: SlowStop Steel Pipe – European Sourced

Change: Undercoating

Due to supplier interruptions as a result of the COVID-19 pandemic, steel pipe delivered from our European warehouse may not be galvanized. Instead, we have secured undercoating that matches the electrocoating (KTL) used on our cast iron bases and connectors. This will maintain a C5 corrosion resistance rating.

For outdoor or marine applications it may still be possible to arrange for galvanization, however this will be a special order and delivery time may be delayed.

There is no pricing change associated with this change. Literature and documentation will be updated going forward to reflect this change.
